**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 August 2002.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 26 August 2002 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 6, 7, 10-16, and 19-22 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,099,745, granted to McKenney et al (hereafter McKenney).

McKenney discloses, referring to figures 3-6, a flexible PBC including a component mount section (rigid area) and a cable section (flex area) connected thereto, a circuit strata (30) comprising all the circuit layers of the board, located in both the cable and component mount sections, circuit patterns in the circuit layers, the circuit strata covered only by a soft laminated adhesive (80, 82), wherein the PCB is adapted to support mounting of an electronic component [claims 6, 16, 21], wherein the adhesive

is the top and bottom outermost layer of the cable section [claims 7, 12, 13, 15, 20], wherein the adhesive is in substantial contact with the circuit strata [claims 10, 14, 19, 22] indeed even a circuit layer [claim 11]

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 2, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKenney.

McKenney discloses, referring to figure 6, a flexible PBC including a component mount section (rigid area) and a cable section (flex area) connected thereto, circuit patterns (signal) provided in the cable section and covered by a soft laminated adhesive (80), the adhesive being the outermost layers of the cable section. McKenney does not

Art Unit: 2827

specifically show an electronic component mounted to the component mount section.

[claims 1, 5] However, it would have been obvious to one having ordinary skill in the art at the time of invention to mount an electronic component to that section since McKenney teaches that it a well known technique in the art (see col. 1, lines 15-30).

The motivation for doing so would have been to supply signals to the PCB.

Moreover, the modified invention of McKenney discloses that the adhesive maintains an average thickness during lamination [claim 2]

#### ***Allowable Subject Matter***

Claims 3-4, 8-9, and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

Applicant's amendment, specifically the newly added limitation "the adhesive being the outermost layers of the cable section", necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2827

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
